

Antoine Jacquemin Ramírez

Product Data & Marketing Analyst

anjaraful@gmail.com · linkedin.com/in/antoine-jacquemin · anjarafull.github.io/portafolio · Mexico City

Data analyst with seven years turning raw data into clean, structured systems people actually decide on. Focused on product data quality, catalog and master-data management, dashboards, and eCommerce optimization across fintech, retail, and consulting.

EXPERIENCE

Data Science Specialist — Independent Consultant

Feb 2025 – Present

Self-employed · Multiple clients

- Deliver data science and analytics projects under contract, building **ETL pipelines** (Python, Pandas, MySQL) that consolidate data from multiple sources, cleaning and standardizing it into reliable, decision-ready datasets.
- Develop interactive **Power BI and Tableau** dashboards with automated reporting for sales KPIs, customer metrics, and financial analysis, including multi-branch operations consolidation and portfolio intelligence.
- Built **FineMetrix**, a SaaS financial-management platform for SMBs now in production: an engine for liquidity ratios, margin, and financial health, plus collections, debt-capacity, and SKU-profitability modules.

Data Analyst — Expansion & Marketing

Aug 2024 – Feb 2025

Sede Café

- Led financial and commercial analysis for the expansion of a growing Mexican coffee chain, evaluating locations with profitability projections and **predictive models in Python** over investment budgets of **\$2–3M per location**.
- Designed Power BI dashboards for operational KPIs and marketing metrics, and controlled a **~\$50K** monthly digital marketing budget.
- Implemented Google Analytics to improve conversion measurement. Identified **three profitable locations** and significantly reduced cost per acquisition.

Data & Marketing Analyst (Project)

Feb 2024 – Jun 2024

Dynasoft

- Consulting project on digital transformation for B2B clients. Analyzed a base of **2,500+ clients**, cleaning, standardizing, and normalizing product and customer data into consistent formats to support the digital migration strategy.
- Built Power BI dashboards and automated reporting with Python and SQL, connecting product data to digital and eCommerce performance so leadership and product teams could act on reliable numbers.
- Delivered **under** the \$2M project budget and improved client retention.

Product Data & Growth Analyst

Aug 2022 – Jan 2024

Grupo Salinas — Tiendas Neto

- Part of the growth and expansion team of a national retail chain, working daily with large product catalogs and **SKU-level** data.
- Managed and improved **product data quality**: validation, consistency checks, deduplication, and standardization to keep product master data accurate across systems.
- Maintained structured product information following **PIM logic** and worked with **ACES & PIES** data, mapping attributes, categories, and identifiers into strict schemas so the catalog stayed machine-readable on every platform that consumed it.
- Built Tableau dashboards for sales, performance, and profitability, and handled customer segmentation over **30,000+ records**, tracking ROI on an \$8–12M-per-store expansion plan.

Marketing Analyst & Growth Specialist

Jan 2020 – Jan 2022

Donadora · Fintech

- Managed a ~\$500K annual marketing budget with daily control of spend on Facebook Ads and Google Ads.
- Analyzed CAC, ROAS, and conversion rate, running A/B tests and funnel optimization.
- Built customer segmentation through RFM analysis over ~30,000 users and automated reporting with Python, SQL, and Google Data Studio.

CORE SKILLS & TOOLS

Product data quality & standardization
PIM logic & catalog / master data
ACES & PIES data management
Data cleaning, deduplication, validation
eCommerce data optimization
SQL, MySQL & advanced Excel

Python & Pandas for analysis
ETL pipelines
Power BI & Tableau dashboards
Google Analytics 4, Google Ads, Meta Ads
RFM segmentation & cohort analysis
A/B testing & funnel optimization
